

Alaska Pandemic Resilience Index

Description: Pandemic Resilience refers to the communities' capacity to withstand, adapt, and recover from a pandemic like COVID-19. The pandemic resilience index ranks the boroughs and census areas of Alaska based on economic, demographic, and health care factors combined. Each county receives a percent rank from 0 to 1, where 0 refers to the least resilient, and 1 refers to the most resilient.

Data Source: American Community Survey (ACS) 5-year Estimates (2014-2019 and 2011-2015), Behavioral Risk Factor Surveillance System (BRFSS), Centers for Disease Control and Prevention (CDC), County Health Rankings & Road Maps
